**QUALITY ENGINEERED SOLUTIONS FOR PAPER MACHINE
DRYER STEAM AND CONDENSATE SYSTEMS.**

QUALITY ENGINEERED SOLUTIONS FOR PAPER MACHINE DRYER STEAM AND CONDENSATE SYSTEMS.

PRODUCTS & SERVICES

- Steam & Condensate System Engineering and Design
- Paper Machine Audits & Benchmark Analysis
- Dryer Section Energy Optimization
- Troubleshooting Services
- Optimal Efficiency Thermocompressors
- Separator Vacuum Receiver and Condensate Collection Modules and Tanks
- Condensers & Heat Exchangers
- Rotary & Stationary Syphons & Joints
- Desuperheaters
- Machine Rebuilds or Upgrades

FULTON SYSTEMS HISTORY

- 1924 Fulton Engineering
- 1927 Midwest Fulton
- 1954 Ross Midwest Fulton
- 1957 Ross Pulp & Paper
- 1984 Hercules Steam Systems
- 1991 Fulton Systems
- 2002 Fulton Systems Acquires TSG Steam Group

PAPER MACHINE DRYER DRAINAGE SYSTEMS ARE

- Integrated, interdependent processes.
- Designed for a specific range of operating conditions including condensing and blowthrough steam flow rates.
- Comprised of components sized and selected for each application.

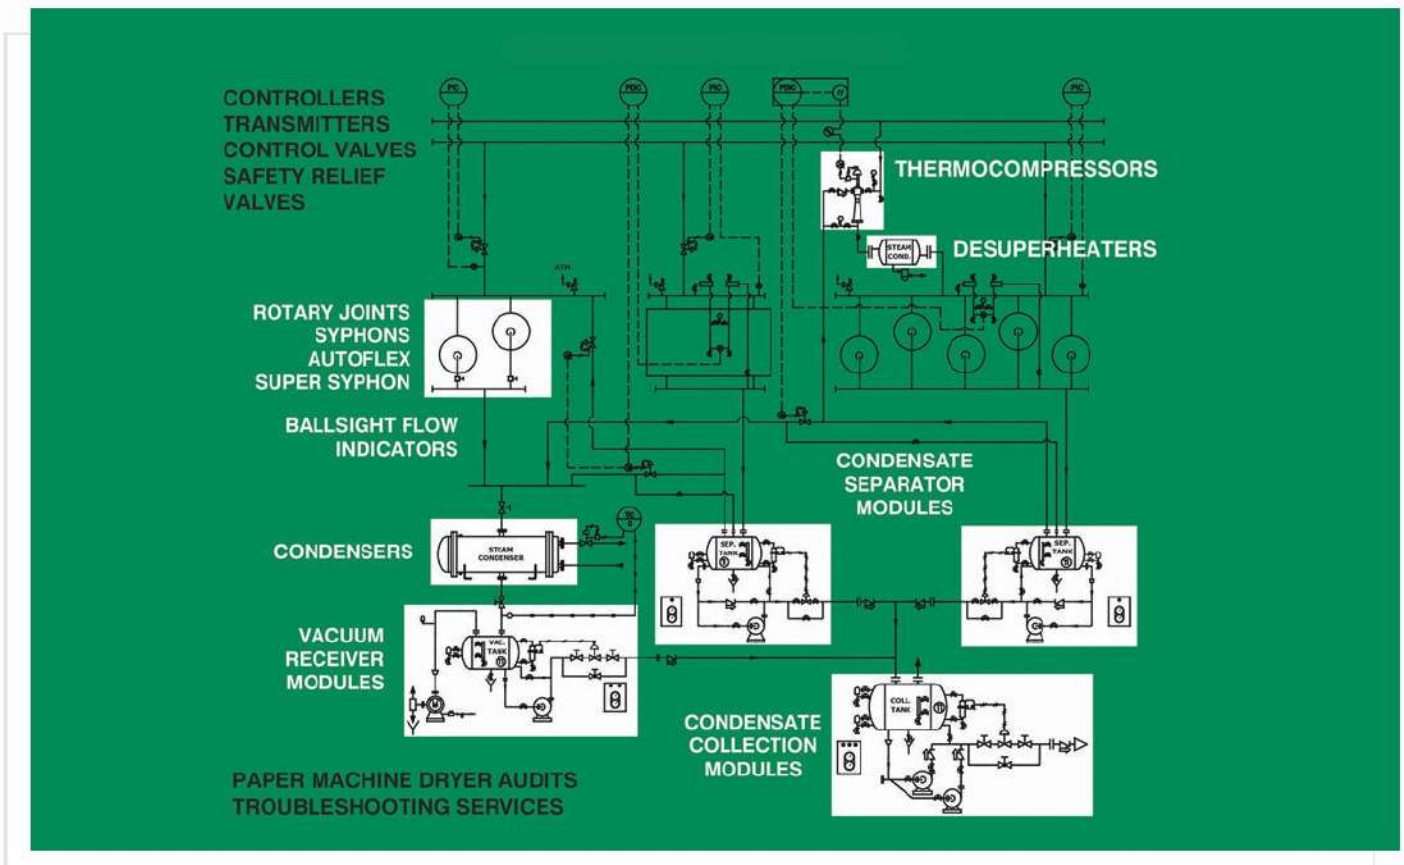

AN OPTIMIZED DRYER DRAINAGE SYSTEM PROVIDES

- Improve drying rates for increased production, operational flexibility, and minimal energy consumption.
- Reduced cross machine temperature deviation, improved curl control, reduced picking, and high product quality.
- Efficient steam utilization and improved condensate collection for higher thermal efficiency and reduced cost.

SEPARATOR, VACUUM RECEIVER, & CONDENSATE COLLECTION MODULES
